

Time	Title	Presenter (underlined) / Contributors
08:10	Using gem5 For Open Source Computer Architecture Research	<u>Matthew D. Sinclair</u> [<u>University of Wisconsin-Madison</u>]
08:45	Enabling gem5 Full System Simulation for Modern Android	<u>Francesco Peverelli</u> [<u>Huawei</u>]; Boris Grot [University of Edinburgh]
09:10	Extensible Runtime Thermal Modeling in gem5	<u>Akanksha Chaudhari</u> [<u>University of Wisconsin - Madison</u>]; Alex Smith [University of Wisconsin - Madison]; Matthew D. Sinclair [University of Wisconsin-Madison]
09:35	Visualizing gem5 O3CPU Execution Traces with Perfetto	<u>Anton Shurygin</u> [<u>Moscow Center for Advanced Studies</u>]; Andrey Derzhavin [Moscow Center for Advanced Studies]; Denis Los [Moscow Center for Advanced Studies]
10:00	Coffee break	
10:45	Bringing Arm Cortex-M to gem5: Enabling Embedded Robotics Research	<u>Zhantong Qiu</u> [<u>University of California, Davis</u>]; Derin Ozturk [Cornell University]; Jason Lowe-Power [University of California, Davis]; Christopher Batten [Cornell University]
11:10	Updating gem5's Memory Dependence Prediction with PHAST	<u>Luke Panayi</u> [<u>Imperial College London</u>]; Sebastian Sumin Kim [University of Murcia]; Alberto Ros [University of Murcia]; Martin Berger [University of Sussex]; Paul Kelly [Imperial College London]
11:35	RISC-V KVM Acceleration in gem5: Fast Full-System Linux Boot and Handoff to Detailed Simulation	<u>Selim Sandal</u> [<u>Ozyegin University</u>]; Ismail Akturk [Ozyegin University]; Zhenman Fang [University of Minnesota]
12:00	Lunch	
13:30	Analyzing gem5 Commit-Code Inconsistency with LLMs	<u>Elise Song</u> [<u>University of Wisconsin-Madison</u>]; Aaryan Patel [University of Wisconsin-Madison]; Guruprasad Viswanathan Ramesh [University of Wisconsin-Madison]; Jack West [University of Wisconsin-Madison]; Lance Hartung [University of Wisconsin-Madison]; Ethan Cecchetti [University of Wisconsin-Madison]; Kassem Fawaz [University of Wisconsin-Madison]; Joshua San Miguel [University of Wisconsin-Madison]; Matthew D. Sinclair [University of Wisconsin-Madison]
13:55	System-Level Modeling of Digital In-Memory Computing Accelerators in gem5 for Edge SoC	<u>Tiya Jreige</u> [<u>Politecnico di Milano</u>]; Tommaso Spagnolo [Politecnico di Milano]; Cristina Silvano [Politecnico di Milano]

Time	Title	Presenter (underlined) / Contributors
14:20	CDS: Deadline-Aware, Multi-Chiplet GPU Scheduler in gem5	<u>Tanmay Anand</u> [<u>Microsoft Corporation</u>]; Matthew D. Sinclair [University of Wisconsin-Madison]; Michael Swift [University of Wisconsin-Madison]
14:45	Hardware Security Evaluation in gem5: Benchmarking Microarchitectural Attacks	<u>Daphne Han</u> [<u>University of Wisconsin-Madison</u>]; Elise Song [University of Wisconsin-Madison]; Joshua San Miguel [University of Wisconsin-Madison]
15:10	gem5 Support for Pseudo-Random Number Generation	<u>Ranganath Selagamsetty</u> [<u>University of Wisconsin - Madison</u>]; Paridhi Gupta [University of Wisconsin - Madison]; Wuzhen Li [University of Wisconsin - Madison]; Joshua San Miguel [University of Wisconsin-Madison]; Mikko Lipasti [University of Wisconsin - Madison]
15:35	Coffee break	
16:00	CRISPIER: A CRISP-Based DVFS Implementation in gem5 for AMD GPUs	<u>Nishant Aggarwal</u> [<u>University of Wisconsin-Madison</u>]; Rutwik Jain [University of Wisconsin-Madison]; Matthew D. Sinclair [University of Wisconsin-Madison]
16:25	gem5-micro: Programmable Micro-Op Access for Architecture Research	<u>Puneetha Ramachandra</u> [<u>Google</u>].
16:50	Closing Remarks
